Project Name		Nutrition Assistant Application
S. No	PAPER NAME	DESCRIPTION
1.	Problem Statement	This is about helping people to maintain a healthy routine and to have a better lifestyle. We are creating a cloud application to help people to maintain a proper diet.
2.	Uniqueness	<ul style="list-style-type: none"> • Providing a healthy way of diet plan for every individual by considering their BMI value. • Help user to remind their exercise schedule • Conduct classes on general nutrition education • Reminding water consumption.
3.	Customer Satisfaction	The customer will get satisfied by knowing the amount of nutrition content present in that food. People will be able to reduce their weight by following the diet recommended for them. This application will create a revolution about leading a healthy life.
4.	Solution Description	<p>The customer will get satisfied by knowing the amount of nutrition content present in that food.</p> <p>People will be able to reduce their weight by following the diet recommended for them. This application will create a revolution about leading a healthy life.</p>
5.	Scalability of the Solution	There should not be any bugs while using the app. It should give accurate and fast updates. It should work well.
